PROFESSIONAL PROFILE

Data analyst and technical consultant with experience preparing, validating, and analyzing business data using SQL, Python, and BI tools. Builds clear dashboards and translates customer, financial, and operational findings into practical recommendations. Also contributes to enterprise solution implementation, requirements analysis, technical documentation, and stakeholder communication. Brings a quantitative Mechanical Engineering background and a strong focus on accuracy.

CORE SKILLS

Data analysis: data cleaning, validation, exploratory analysis, segmentation, cohort and retention analysis, reporting, documentation review.

SQL and databases: PostgreSQL, Microsoft SQL Server, MySQL, Oracle; joins, CTEs, window functions, aggregations, data quality checks.

Python and BI: Python (pandas, NumPy, Matplotlib), Power BI (Power Query, DAX, Dataflows), Tableau, Excel (PivotTables, VLOOKUP).

Cloud and implementation: Microsoft Azure, Google Big Query, Snowflake, REST APIs, Oracle database systems, technical requirements and solution documentation.

PROFESSIONAL EXPERIENCE

Adroit Solutions LTD (Affiliate of Adroit Consulting UK) | Technical Consultant May 2026 - September 2026

- Implemented an anti-money laundering solution for Fidelity Bank, working with Oracle databases, RESTful APIs, and associated application infrastructure.
- Analyzed and validated business and technical requirements; identified inconsistencies, gaps, duplication, and process issues to support accurate solution outputs.
- Clarified ambiguous requirements with stakeholders and documented system observations, edge cases, and recommendations for technical and non-technical teams.

Zitra Microfinance Bank | Direct Sales Agent (DSA) June 2025 - May 2026

- Onboarded customers, guided account-opening processes, and promoted account funding initiatives to support acquisition goals.
- Resolved account inquiries and maintained customer information accurately in a target-driven financial services environment.

Eni-Tony Ventures | Finance Intern January 2022 - December 2023

- Prepared financial reports and yield analysis to support management decisions and workflow improvements.
- Supported audits, invoice checks, documentation verification, and data validation to improve reporting accuracy and record quality.

Afolabi Dinehin and Sons | Engineering Intern January 2024

- Supported equipment inspection, servicing, and maintenance while following safety procedures and maintaining technical documentation.

SELECTED DATA ANALYTICS PROJECTS

Loan Default Risk Analysis **Power BI | Power Query | DAX**

Built a reusable Power BI report using Power Query, a Dataflow, and DAX to examine loan volume, borrower profiles, and default trends. Default rates held between 11.50% and 11.75% from 2013 to 2018, with differences by employment type.

Customer Shopping Behavior Analysis **Python | PostgreSQL | Power BI**

Prepared and analyzed 3,900 purchase records with Python, PostgreSQL, and Power BI. Average purchase amounts were $59.49 for subscribers and $59.87 for non-subscribers; this descriptive comparison does not establish causation.

What the Data Analyst Job Market Rewards **PostgreSQL | SQL**

Analyzed 2023 job postings for role demand, pay, and skills. Among the 10 highest-paying listings reviewed, SQL appeared in 8, Python in 7, and Tableau in 6.

Customer Lifetime Value, Cohorts and Retention **PostgreSQL | SQL**

Used customer segmentation, cohort comparisons, and retention analysis. The project reports that the highest-value 25% of customers contributed 66% of revenue ($135.4M), while newer cohorts showed lower revenue per customer.

Shipment Logistics Data Cleaning **PostgreSQL | SQL**

Standardized shipment records and added quality flags for missing dates and locations, invalid weights or item counts, date-order errors, and freight-cost outliers.

Music Store Exploratory Analysis **PostgreSQL | SQL**

Wrote 11 SQL queries using joins, CTEs, aggregations, and window functions to explore sales, customers, artists, genres, and geographic patterns; identified leading markets, top customers, and popular genres.

EDUCATION

Bachelor of Engineering (B.Eng.), Mechanical Engineering | 2019 - 2025

Federal University of Technology, Akure, Ondo State, Nigeria

AWARDS AND LEADERSHIP

NUGA Games chess team gold medalist (2025).

Recognized for leadership and responsibility through Assistant Head Boy and Prefect roles.
